

Economic Activity Index

For the month of August 2012

General Commentary - August 2012

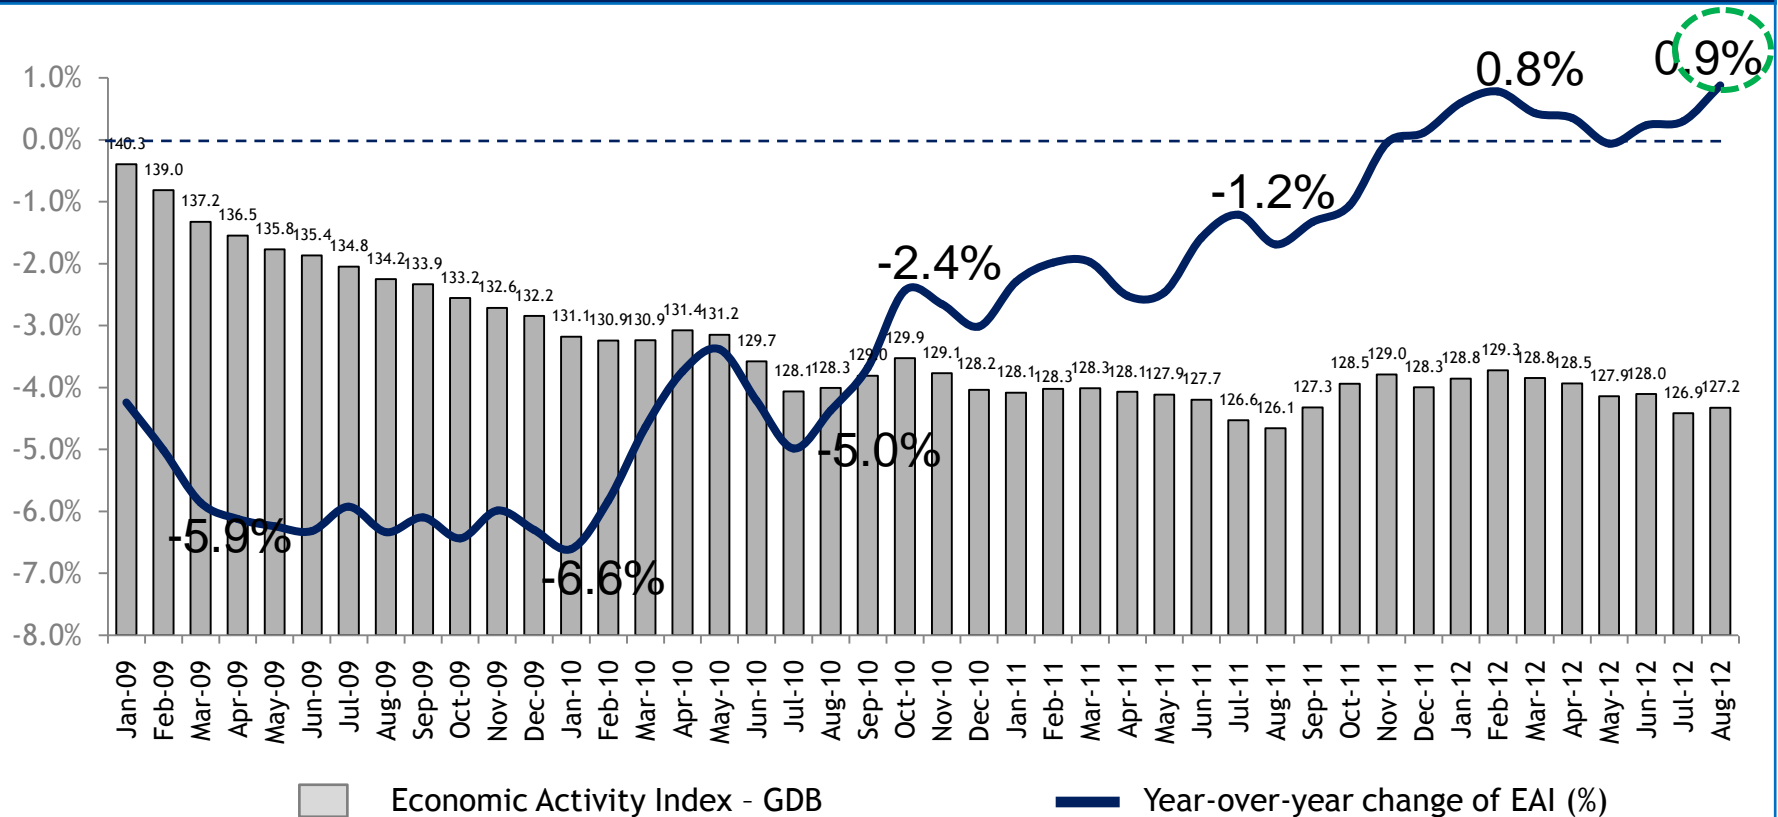

GDB-EAI for the month of August registered a 0.9% year-over-year (“YOY”) increase, maintaining the positive trend started in December 2011.

- August 2012 EAI was 127.2, a +0.9% increase when compared to 126.1 for August 2011 .
- Cement sales totaled 1.637 million bags, registering a YOY increase of 24.0%. Total sales for calendar year-to-date (“YTD”) are 10.9% above same period for calendar year 2011.
- Unemployment rate decreased to 13.5% (seasonally adjusted) when compared to August 2011 when the unemployment rate was at 15.5% (seasonally adjusted).
- Electric power generation totaled 1,994 million kWh, reflecting a YOY increase of 1.9%. Total electric power generation for fiscal year 2012 ended 1.9% below fiscal year 2011.
- Total household employment continued its upward trend totaling 1,096,100 in August 2012, a YOY increase of 1.9%.
- Total non-farm payroll employment for August 2012 totaled 906,200, a YOY reduction of 0.6%.
- Gasoline consumption* was 88.3 million gallons, while average calendar year consumption through July is 86.9 million gallons per month.

* Estimated monthly gasoline consumption is derived from the Treasury Department’s monthly gasoline excise tax collections. These monthly collections tend to have irregular patterns as major gasoline importers have significant fluctuations in their inventories and purchases. As a result, the estimate used by GDB does not necessarily reflect actual monthly consumption by individuals.

GDB-EAI for August 2012 registered the highest year-over-year growth in 79 months (since January 2006)

GDB Economic Activity Index

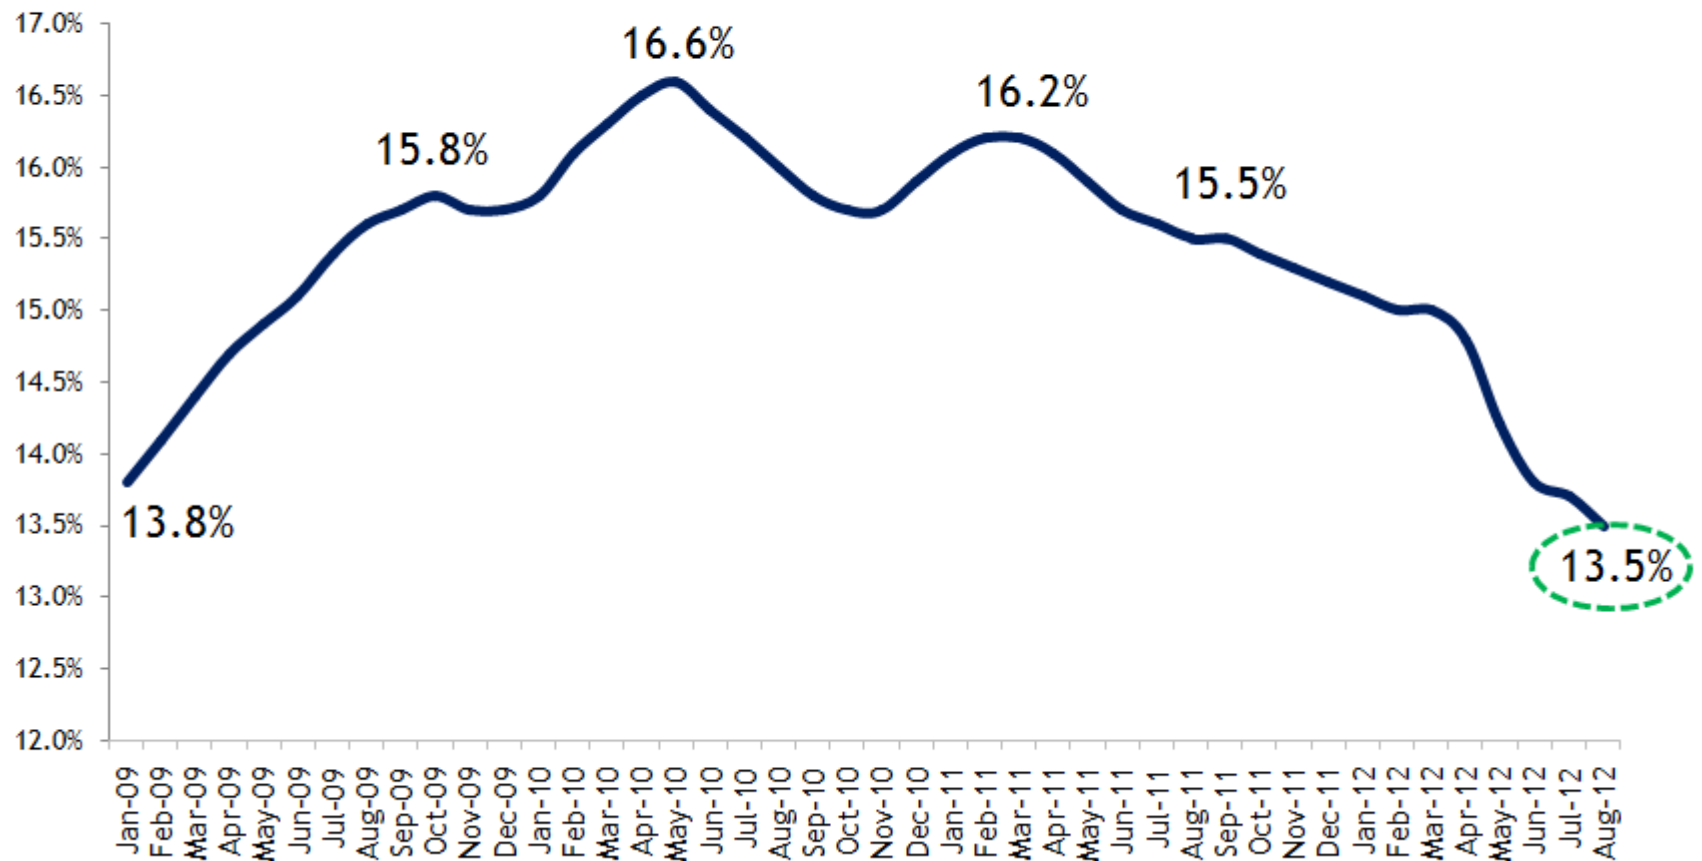

Data used for GDB-EAI is adjusted for seasonality and volatility.

GDB Economic Activity Index Components

Gasoline Consumption

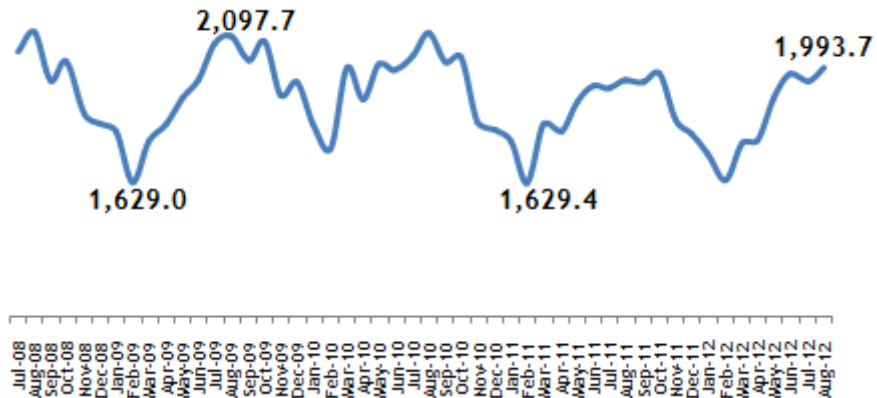

(Millions of gallons)

- Gasoline consumption for August 2012 totaled 88.3 million gallons, a YOY reduction of 5.0%.
- Estimated monthly gasoline consumption is derived from the Treasury Department's monthly gasoline excise tax collections. These monthly collections tend to have irregular patterns as major gasoline importers have significant fluctuations in their inventories and purchases. As a result, the estimate used by GDB does not necessarily reflect actual monthly consumption by individuals.

Electric Power Generation

(Millions of kWh)

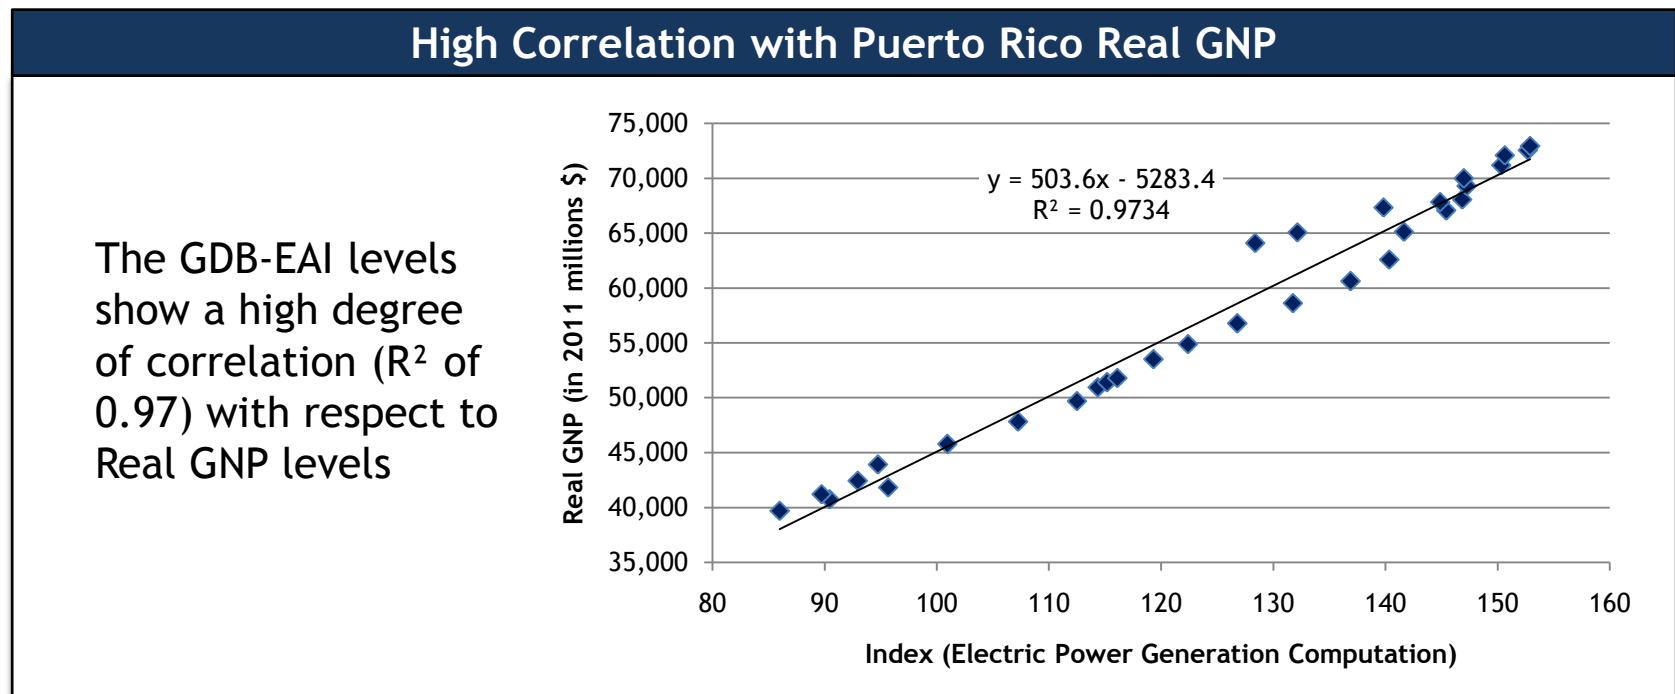

- Electric power generation for August 2012 was 1,993.7 million kWh, a 1.9% YOY increase.
- Electric power generation for fiscal year 2012 ended 1.9% below FY 2011, mainly as a result of higher oil prices.

Description of the GDB-Economic Activity Index

Description of the GDB-EAI

- The GDB-EAI is a coincident index for the economy of Puerto Rico. It is a valuable tool that summarizes the behavior of four major monthly economic indicators.
- This index was developed following the methodology similar to that used by *The Conference Board* in their coincident index. This methodology follows a standard procedure to adjust the data for seasonality and volatility factors.
